Enterprise Resource Planning

A Windows-cum-Web based ERP Package fully integrated with Membership Smartcards (Contactless) to automate any Sports & Recreational Club / Officers' Institute. Thus ensuring the utmost utilization of all the available resources with the Club, including skilled and not-so-skilled manpower.

Basically, the complete automation system works on a single-point entry system where any information entered once from any location gets reflected into various concerned departments automatically, e.g. payments received in the Cash Counter or at the reception including cash coupons etc. gets transferred to A/c's receivable and Members'A/c's automatically. There is no location where any info needs to be replicated manually again.

Modules

|	
ADMIN & SECURITY MANAGEMENT	**LIBRARY MANAGEMENT**
WAIT LISTED / REGISTRATION	**STORES (ASSETS) MANAGEMENT**

   xxxxxxxxxxxxxxxxxxxxxxxxxxx.
3. xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
   xxxxxxxxxxxxxxxxxxxxxxxxxxx.
Address:- Street No. xxxx, State xxxx,
          Pincode:-xxx xxx

CARD BODY(FRONT)   **ANTENNA**   **CARD BODY(BACK)**

Contactless Membership Smart Cards contain an embedded antenna instead of contact pads attached to the chip for reading and writing information contained in the chip's memory. They do not have to be inserted into a Smart Card Reader. Instead, they need only to be passed within range OR for better security to be placed onto the Smart Card ReaderM/riterto read and store information on the chip.

The Club Members along with their respective Spouse & Dependant(s) will be provided with the personalized Membership Smart Cards with color Photograph and credentials (Membership_ID, Name, DOB etc.) having emory to store information in TWO different sections.

Section – I will have info pertaining to Members including Member ID, Name, Category, Status, etc.

Section –II will have the function of having Electronic Money to record financial Transactions in a secured encrypted format.

Proximity Detection feature:
An automatic anti-tear mechanism is deployed for secure deployment of keys. If a Card is removed from the Reader during a key/record update, it will immediately stop the update and automatically falls back to the previous key.
